

**Amendments to the Claims:**

**Listing of Claims:**

1. (Previously Presented) A method for completing a print job, comprising:  
  
delivering at least one print job to a printing device;  
  
bringing a tag containing information to be incorporated into the print job into  
  
close proximity to the printing device so that the device receives the  
  
information from the tag; and  
  
incorporating the information received from the tag into the print job.
2. (Original) The method of **claim 1**, wherein the information received from the tag includes printing preferences of the user.
3. (Original) The method of **claim 1**, wherein the information received from the tag is a related print job.
4. (Canceled)
5. (Original) The method of **claim 1**, wherein the print job is delivered in an encrypted form, and  
  
wherein the tag contains a decryption key so that the job may be printed.
6. (Original) The method of **claim 1**, wherein the tag is part of a cellular telephone.
7. (Original) The method of **claim 1**, wherein the tag is part of a personal digital assistant.

8. (Original) The method of **claim 1**, wherein scanning a tag includes sending a signal to the tag, and receiving a signal containing information about the tag from the tag.
9. (Original) The method of **claim 8**, wherein the signal is a radio frequency signal.
10. (Original) The method of **claim 8**, wherein the signal is an infrared signal.
11. (Previously Presented) The method of **claim 1**, wherein the device includes an optical scanner for scanning documents.
12. (Previously Presented) The method of **claim 11**, wherein the optical scanner is used to scan the tag.
13. (Original) The method of **claim 1**, wherein the tag contains a bar code.
14. (Original) The method of **claim 1**, wherein the tag contains glyphs.
15. (Previously Presented) A method for transferring documents from one location to another, comprising:
  - sending at least one document to be transferred to the queue of a device having document transmission capabilities;
  - bringing an electronic tag containing information in close proximity to a tag reader operably connected to the device having document transmission capabilities so that the tag may be read and information is received by the device; and
  - using the information received from the tag to transmit the document.

16. (Original) The method of **claim 15**, wherein the information received by the device includes at least one fax number to which the job is to be sent.

17. (Original) The method of **claim 15**, wherein the information received by the device includes at least one email address to which the job is to be sent.

18. (Previously Presented) A system for generating an advertisement, comprising:

a tag encoded with advertising information;

a tag reading device for reading the tag and receiving the advertising information therefrom;

an output device operably connected to the tag reading device, wherein the output device generates an advertisement using the advertising information from the tag.

19. (Original) The system of **claim 18**, wherein the output device includes a printing device.

20. (Original) The system of **claim 18**, wherein the output device includes a facsimile device.

21. (Original) The system of **claim 18**, wherein the output device is connected to the Internet.

22. (Original) The system of **claim 18**, wherein the tag is included in one of a broach, a tie clip, a pen, and a container.
